

EVAN SIMPSON

Data Analyst | BI Strategist | AI Engineer

p.evansimpson@gmail.com | github.com/educatorsRlearners | linkedin.com/in/evansimpson1

PROFESSIONAL SUMMARY

Creative, curious, and technically adept analyst with 5+ years of experience helping impact-driven organizations measure performance, foster continuous improvement, and drive outcomes through data. Skilled at leading stakeholder sessions to establish shared goals, and designing KPIs to spark improvement. Comfortable navigating between technical, non-technical, and executive conversations including reporting directly to C-suite leadership. Experienced consulting across sectors, managing multiple client relationships simultaneously, and collaborating with data engineers, UX designers, and cross-functional teams to deliver solutions. Passionate about improving the world one commit at a time.

CORE SKILLS

BI Strategy & Dashboard Design: Tableau (5+ years), KPI framework design, dashboard architecture, data storytelling, public-facing data stories and visualizations

Data Analysis & Programming: SQL, R, Python, data wrangling, statistical analysis, A/B testing, AI/machine learning

Client Engagement & Consulting: Leading goal-setting sessions, needs assessments, client-facing presentations, managing multiple client relationships, survey and form design

Cross-Functional Collaboration: Working with data engineers, UX/product designers, data scientists, and executive stakeholders; navigating technical and business conversations

Data Engineering & Infrastructure: dbt, Fivetran, AWS Redshift, data pipeline design, data integration specifications, data quality assurance

Privacy & Security: Working within GDPR and COPPA compliance frameworks, data anonymization, access controls and permissions

Social Impact & Outcomes: Performance measurement, continuous improvement, outcome-driven analytics, education and social sector expertise

PROFESSIONAL EXPERIENCE

Data Team Lead | *Mrs Wordsmith (Education Technology)* | Oct 2025–Mar 2026 | Remote

- Led stakeholder sessions with product, pedagogy, and marketing teams to establish shared goals and define KPI frameworks measuring student outcomes and product performance
- Reported directly to C-suite; hired and mentored a team of 3–5 analysts, fostering continuous improvement in data practices
- Collaborated closely with UX/product designers on game design decisions, dashboard and report design, and user flow optimization—translating data insights into design improvements
- Designed and maintained Tableau dashboards translating complex data into clear visualizations and reports that drove strategic decision-making across the organization
- Led A/B experiments across game features, website changes, and learning content to measure impact and optimize outcomes
- Set technical specifications for data integration across multiple sources using dbt and Fivetran; ensured data quality and pipeline reliability
- Worked within GDPR and COPPA compliance frameworks across all data systems, ensuring children's data and EU user privacy were respected in analytics design, data collection, and reporting

Data Scientist / Analytics Engineer | *Mrs Wordsmith (Education Technology)* | Dec 2022–Oct 2025 | Denmark

- Built Tableau dashboards and visualizations helping leadership and product teams interpret engagement indicators and generate insight into learning outcomes
- Researched and identified relevant data sources for investigation; analyzed player behavior and engagement data to uncover trends, anomalies, and improvement opportunities
- Recommended KPIs for priority goals; collaborated with cross-functional teams to align metrics with organizational outcomes
- Coordinated multi-institutional research partnership (Carnegie Mellon University); managed project delivery from conception through completion

Freelance Data Consultant | *Various Organizations* | 2020–Present | Remote

- Provided data strategy, analytics, dashboard design, and training to organizations across multiple sectors
- Led client discovery sessions to understand organizational goals and identify how data could measure and communicate performance

Machine Learning Intern | *MetaMetrics* | Nov 2020–May 2021 | Remote

- Built data pipelines and datasets for education-focused analytics using Python; collaborated with cross-functional research team to deliver analytical solutions

Assessment Solutions Consultant | *British Council* | Sep 2017–Jan 2020 | Shanghai, China

- Managed multiple institutional client relationships simultaneously (universities, government agencies, and other organizations), ensuring successful adoption of assessment products and practices
- Led sessions with clients to set shared understanding of goals and identify how data could measure and communicate performance
- Designed surveys to measure workshop quality and client satisfaction; analyzed results and presented recommendations to stakeholders
- Analyzed 600,000+ assessment records leading to changes in training methods; designed reports and visualizations interpreting indicators for both technical and executive audiences
- Presented data-derived stories at national conference in China, crafting narratives that communicated organizational impact to diverse stakeholders

English Language Educator | *International Teaching Roles (Asia & USA)* | 2003–2016

- 13+ years in education with deep understanding of social impact measurement, program outcomes, and continuous improvement in learning contexts

EDUCATION

Master of Arts (MA), TESOL – University of Arizona

Bachelor of Arts (BA), English Literature – Boise State University

PROFESSIONAL DEVELOPMENT

University of Pennsylvania – [Data Science Methods for Digital Learning Platforms](#)

[Data Science Retreat](#) – Python, Machine Learning, Data Engineering

DeepLearning.AI – [TensorFlow](#) and [NLP Specializations](#)

[DataCamp](#) – SQL and Python

Udemy – [dbt](#) and [Tableau](#)

[University of Cambridge](#): Certificate in English Language Teaching to Adults (CELTA)
